OBJECTIVE

Motivated and results-oriented Bachelor of Science in Information Technology graduate seeking an entry-level Front-End Developer/Web Developer position to utilize strong programming skills, technical expertise, and a passion for technology in developing innovative web solutions that support organizational growth and success.

EDUCATION

Bachelor of Science in Information Technology August 2022 – June 2026
University of Eastern Philippines – Main Campus | **Magna Cum Laude**
University Town, Northern Samar

TECHNICAL SKILLS

- Web Development: HTML, CSS, React, Node.js, Tailwind, Vite
- Backend Framework: Express.js
- Databases: MySQL, MongoDB
- Tools: Git, GitHub, Visual Studio Code, Postman
- Other Skills: REST API Development, Responsive Web Design, CRUD Operations

EXPERIENCE

On-the-Job Trainee (Web Development) | UEP-ICT Feb 2026 – May 2026

- Developed a School Management System for UEP Laboratory Elementary School to digitized records using React.js, Tailwind CSS, and Express.js.
- Created responsive user interfaces and efficient system logic for university-wide digital tools.

Web Developer (Student Assistant) | UEP-ICT Nov 2024 – Feb 2025

- Collaborated within a development team to design and implement the UEP E-Services System, improving digital accessibility for campus resources
- Developed dynamic reporting modules for official documents, including the Personal Data Sheet (PDS) and Individual Performance Commitment & Review (IPCR) forms and others, using React/Next.js.
- Integrated backend APIs to synchronize real-time faculty data

PROJECTS

Smart Farming Monitoring System – Capstone (Leader)

Tech Stack: HTML, CSS, JavaScript, Vanilla.js, Node.js

- Developed a real-time web dashboard to visualize environmental sensor data, including NPK levels, moisture, and temperature.
- Integrated IoT hardware with a backend database to automate soil monitoring and data logging.

UEPLES School Management System

Tech Stack: React, Node.js, MySQL, Tailwind

- Built a secure student records system with different login levels for Admins, Teachers, and Students to safely manage and store school data.
- Developed the backend using Node.js to handle full database actions and created REST APIs for real-time system updates and approvals.

University Event Management System

Tech Stack: React, Node.js, Spring Boot, MySQL

- Built a web platform with role-based access control (Admin, Teacher, Student) for managing campus events.
- Implemented full CRUD functionality and REST APIs to handle real-time event creation and approvals.
